Subject: 8/28 agenda, participants, and OGC participation

Eric,

I understand the agenda below is nearly final, with a couple of tweaks:

--Fourth bullet may read something like this: "CFA pooling of data vs. daily max summary"

--Still TBD as to whether participant list will appear on the agenda.

These are the folks I understand will join from the state: Kelly Sustman, Jim Belotti, and one other person.

Region 10 participants will be Dan Opalski, Dave Croxton, and Jim Keating will join from HQ.

Tribe participants are TBD (3 folks, possibly including Z. Welcker, who may be the tribe's attorney).

At this time I understand we can relay to Jim Curtin that the participants list is still in flux. I've asked Dave Croxton for more info by Monday, August 26, as to who from HQ should be on the phone, if anyone.

Today I will review the script Dave sent, and let you know either way if there are any areas of concern that I have, along with Jim Keating's concerns, if I receive them by 3 pm today.

Jim—please note the time frame above.

Also, I will provide you highlights from yesterday's call, Eric.

Thanks,

Sarah

Sarah – I agree with Jim that this generally looks good and is consistent with our conversations with R10 over past few days. Note – you mentioned that John was interested in adding to the agenda a discussion on outreach with other stakeholders. If we are lucky enough to get that far in the conversation, I think that could be part of the “path forward” discussion. I don’t think we need to call that out as a specific agenda item. Cheers

Here is a draft agenda for our 8/28 meeting for your review. Perhaps we can finalize it during our Thursday meeting. Thanks

Pend Oreille River Temperature TMDL Status Meeting

Seattle, WA • August 28, 2013

EPA, Room 12B or 15U

-

Draft Agenda:

-

- Introductions

- Statement of Meeting Objectives and Background by EPA

- Brief statements by Tribe, Ecology if desired

- EPA Presentation of Technical Issues: CFA, Time-lag, Border condition- – including EPA analyses provided to Ecology and the Tribe on **date** and **date**, respectively [we should consider **whether we want to break these out in any greater specificity**].

- Discussion and feedback on technical issues from Tribe and Ecology
- Identification of potential solutions and path forward
- Next steps
